

# WHAT IS ETHEREUM

# WHAT IS ETHEREUM

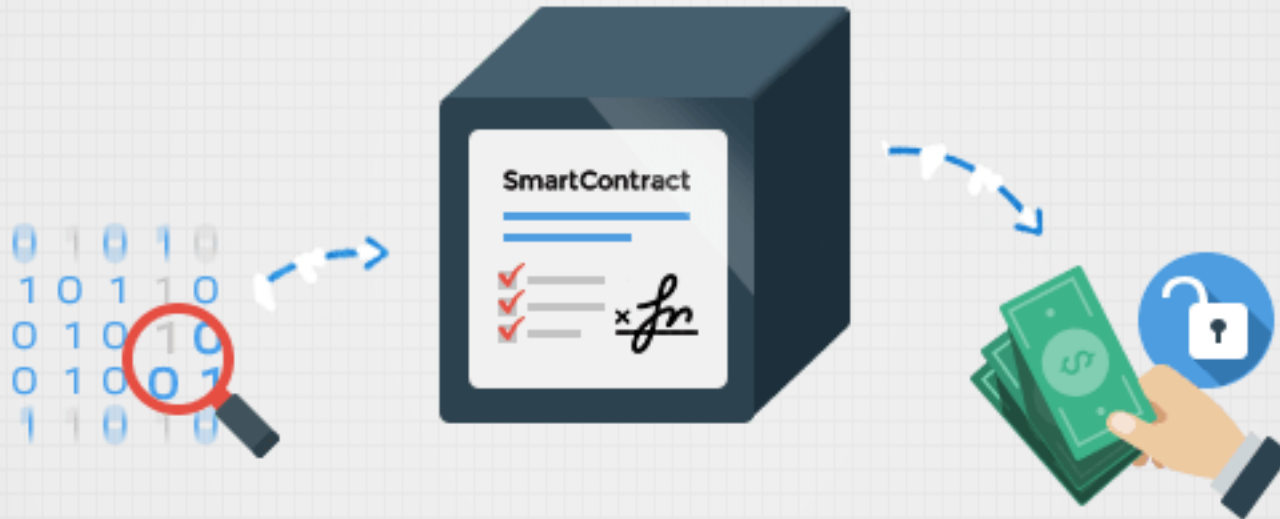

- An Open Source Blockchain-based distributed computing application platform
- Mainly used to building & implementing smart contracts functionality
- It offers Decentralized Virtual Machine aka Ethereum Virtual Machine
- Initiated by Vitalik Buterin in Late 2013
- Ethereum's live Blockchain was launched on 30 July 2015

# HOW IT IS DIFFERENT FROM BITCOIN

- Like Bitcoin, Ethereum is a distributed public Blockchain network
- Ethereum differ substantially in purpose and capability
- Bitcoin offers one particular application of Blockchain technology
- Ethereum Blockchain focuses on running the programming code of any decentralized application.
- In the Ethereum blockchain, instead of mining for bitcoin, miners work to earn Ether, a type of crypto token that fuels the network.
- Beyond a tradeable [cryptocurrency](#), Ether is also used by application developers to pay for transaction fees and services on the Ethereum network.
